Industry leading guarantees

Freefoam has made a life-long company commitment to make and guarantee long life products through refining technical and manufacturing resources and the cumulative experience of product performance over many years.

50 Year Lifetime Extended Guarantee

Freefoam offers an extended 50 year Lifetime transferable guarantee on all white profiles in addition to the standard 20 year guarantee. The extended guarantee is available on roofline, cladding and rainwater installation projects, where only the Freefoam brand is used and fitted, and registered online by a Freefoam Registered Installer.

20 Year Standard Guarantee

All white Freefoam products are automatically covered by its standard 20 year guarantee. Products are guaranteed not to warp, crack, discolour or blister and provide resistance to air pollution. This level of protection can simply be extended to the industry leading Lifetime Guarantee.

10 Year Guarantee

Colour

The Freefoam colour range of fascia, soffit, cladding and rainwater products is eligible for a 10 Year Guarantee unique in the roofline industry. Backed by Freefoam's own innovative Colormax®.

Woodgrain

The Freefoam woodgrain range of fascia, soffit and cladding is eligible for a 10 Year Guarantee. Manufactured with market leading Renolit EXOFOL MX foil with Solar Shield technology (SST) which offers built-in sun reflection that reduces heat absorption, thus minimising profile temperature and expansion.

Fully transferable

The Freefoam guarantee doesn't end when a property changes hands. It can be transferred to the new owners and subsequent owners so they can continue to enjoy the same peace of mind. Some guarantees only cover domestic properties, but the Freefoam guarantee can also be used by landlords and specifiers from Local Authorities, Housing Associations and commercial projects.

Cladding

A range of exterior cladding products to provide not only a decorative but also a protective facing to any new build or renovation project.

- Standard Open V and Shiplap styles in white and woodgrain finishes.
- Fortex® embossed cladding in Double Shiplap and Weatherboard styles.
- X-Wood 16mm woodgrain heavy duty cladding.

Durable

- Standard white cladding products are eligible for a standard 20 year guarantee that can be extended to an impressive 50 year guarantee when registered online.
- Woodgrain, Fortex embossed and X-Wood cladding comes with a 10 year guarantee.

Light and easy to install

PVC-U cladding panels are designed to make storing, handling and fitting quick and easy. With the weatherboard cladding weighing just 3.15kg per 5 metre board it is 4 times lighter than comparable fibre cement board.

A+ rated

PVC cladding offers a sustainable solution. Fortex comes with significant environmental credentials with the Building Research Establishment's (BRE) 'Green Guide To Specification, giving PVC cladding an A+ rating when installed with standard components.

Cladding Calculator

Knowing how much exterior PVC cladding you will need for an installation project can be difficult.

Freefoam has made it easy by providing a free Cladding Calculator to help you estimate how much cladding will cover the area in question. Our calculator will help to eliminate high amounts of wastage, saving you money and the environment.

To help with your cladding calculations visit <https://freefoam.com/professional>

Freeflow®

Rainwater Systems

Freefoam offer the Freeflow® range of innovative, high quality PVC-U rainwater systems.

Each rainwater system is co-extruded with a white interior and a range of exterior colours - Freefoam's innovative solution to the problems associated with rapid heat absorption and expansion of gutters.

Systems

Square, Round, Deep, Ogee and Cast Iron effect

PVC and Acrylic Internal Panelling

GEO[®]
panel

Geopanel[®] is a range of PVC and Acrylic interior decorative wall and ceiling panelling which provides a 100% waterproof stylish, modern and convenient panelling system for bathrooms and kitchens. Providing a cost-effective and practical alternative to tiling. Wall panels available in three different widths - 250mm, 600mm and 1m and ceiling panels available in 200mm.

Easy to fit

- Panels fit together with a waterproof tongue-and-groove joint
- No drying time and grouting
- Fix over existing surfaces, including tiles
- No specialist training required
- Range of PVC and Aluminium trims

FREE Marketing Pack

 **Registered
Installer**

Become a Freefoam Registered Installer TODAY!

There's never been a better time to get your business aligned to one of the major roofline brands.

FREE TO JOIN FREEFOAM!

my freefoam

Reasons to become a freefoam registered installer

- Offer your customers a marketing leading product guarantee straight from the manufacturer*
- Stand out from the crowd. Only Freefoam Registered Installers can offer the Extended Guarantee
- Tools and Sales support to build your business.

Dedicated website www.myfreefoam.com

Free leads!

- For roofline enquiries from www.myrooflinematters.co.uk
- For cladding enquiries from www.mycladding.com

Two ways to register

1 Online

We know that everyone hates paperwork! That's why we've made it really quick and easy to become a Freefoam Registered Installer all at the touch of a button. We've built a dedicated website for all installers called My Freefoam.

Go to myfreefoam.com

- Complete the online form and add your company name
- We will verify you are buying Freefoam products on a regular basis
- Our Area Manager will authorise your account

Once you're registered you will be able to:

1. Register installation work for the 50 year extended lifetime guarantee
2. Edit and update existing registrations
3. Order more marketing materials
4. Update your contact details

2 Complete the form

When you're next at your local Freefoam stockist hand in the completed form. They will handle the whole process for you and Freefoam will send you an email to confirm your registration.

Installation Guide

Preparation

Plan all roofline installation procedures, system components and installation sequence before onsite fitting begins.

Ensure all work is carried out in accordance with good construction practice and complies with relevant Building Regulations.

Access

Never attempt to access the work area with an unsupported ladder or without a stable deck.

Always use a full scaffold platform or a purpose built cantilevered deck system with guard rails.

Storage and Handling

Load and unload by hand and support both ends of a 5m length when handling. Stack no higher than 1m, in pack sleeve on a flat base. Avoid contact with solvents, paint, creosote, bitumen etc. Coloured products should not be stored in direct sunlight, as heat distortion may occur.

Cutting

Use conventional carpentry tools. Run power tools at speeds appropriate for timber. Nail and screw holes do not require pre-drilling.

Asbestos

By law all asbestos materials must be removed by trained operatives under strictly controlled conditions. If you suspect asbestos is present consult your Local Authority before proceeding.

Working Temperatures

Avoid installation in temperatures greater than 30°C or less than 0°C.

Fixing Guidelines

Fixing	Board	Max Centres
N50	Capping Over: FW, FO & FLP	White 600mm Black 300mm Woodgrain and other colours 400mm
N65	Full Replacement: FMS, FMXS, FMO, FMD, FMR, FMF, FMXD	
P40	Soffit	
P30	Soffit	
CP30	Hollow Soffit	

New Build/Full Replacement

Freefoam manufacture a range of Magnum boards for use in full replacement or new build work which require no backing board. The boards are self-supporting and should be fixed with Plastops colour co-ordinated nails.

Freefoam Rainwater system can be fitted directly to Magnum boards without the need for timber support.

If fascia used is less than 15mm then 18mm WBP plywood backing boards should be used.

Capping Over

Freefoam manufacture 9mm and 10mm Plain, Ogee and Square Edge Fascia designed for capping over existing fascia and bargeboard that are in sound condition, or for use with a backing board in refurbishment work.

Available in a wide choice of colours with complete range of matching trims and accessories for a neat finish.

FO Ogee Fascia (10mm)
FW Plain Fascia (10mm)

Standard over fascia installation

Roofline Installation

Ventilation

Freefoam supply a range of roofline ventilation products. Ask your stockist for details. Adequate ventilation of the roof space through eaves, in terms of minimum statutory air path dimensions for various roof configurations in new build constructions, is a specified requirement.

Set out in British Building Regulations 2010: Approved Document F (England & Wales), as well as in its Scottish, Irish and Northern Ireland equivalents.

Order of work

- A** Cut back and replace damaged or worn felt, eaves can be made watertight using an eaves protector.

Use string lines to ensure rafter feet are aligned, If necessary use packing to align rafter feet.

- B** Install soffit bearers using timber battens spanned from rafter feet to the wall. Ensure that they are aligned and level.

Installation of Soffit

- C** If using a F107 'J' Trim fix this at each soffit bearer before soffit is fixed.

- D** Fix soffit boards to bearers using appropriate fixing pins (as shown on page 43). Soffit should extend 5mm beyond rafter if magnum fascia is used.

If fixing hollow soffit with joints perpendicular to fascia boards then supporting bearers will need to occur at each joint.

- E** If necessary boards can be joined at the ends using a F106 H/Joiner. Allow for 6mm extension gap at each end (12mm gap if joining two boards).

Installation of Fascia

- F** When determining fascia size ensure height is sufficient to provide tile kick. Allow for over fascia vents if being used.

- G** Fix Magnum Fascia Board with two N65 Plastops at each rafter end and non Magnum boards (less than 15mm) using two N50 Plastops at each rafter end.

- H** Join lengths of fascia between rafter positions using appropriate matching joiners ensuring 6mm expansion gap is provided at the end of each board.

- I** Use matching corner for internal and external corners. Allow for 6mm extension gap at each end (12mm gap if joining two boards).

Box End

- 1 Finish Fascia level with the face of the rafter gable. Soffit should over hang by 10mm and may be cut square or mitred.
- 2 Measure and cut fascia to form the return to gable wall using appropriate Double Ended Fascia Board, measure and cut box end to suit.
- 3 Measure and cut fascia to form the return to gable wall.
- 4 Remove section from corner joint to fit around rafter.
- 5 Fix fascia as bargeboard directly to gable rafter.

Note: Timber hangers should be installed as required to locate box end structure.

Window Boards and Trims

Preparation

Ensure substrate is clean and dry and is suitably sound to retain the window boards. If rotting or loose timber is present this should be replaced.

Installation

Ensure substrate is level and at the required height to meet the window at the required location. If necessary use packing to level the substrate or to raise the level.

Cut window **A** board to required depth and length. Note: allow extra length if horns* are required and trim board accordingly.

Fix board to substrate using a suitable general-purpose adhesive.

Junction between the board edges and window/reveals should be sealed with low modulus silicone.

If mechanical fixing is necessary use stainless steel screws or nails with plastic heads.

Fix trim **B** at junction between the cill and the window using low modulus silicone.

Cut endcaps **C** to length and fix using a suitable general-purpose adhesive.

Cladding Installation

Fitting instructions are suitable for all cladding ranges. Please see pages 22-26 for details of cladding products.

All Freefoam cladding profiles can be fitted horizontally or vertically.

When installing Cladding boards vertically, additional cross battens fitted vertically must be installed to allow for ventilation.

It is essential that continuous ventilation is maintained between the vertical battens from the top to the bottom and adequate expansion is allowed at the ends of boards.

Typical Installation Sequence

- 1** Fix a suitable breather membrane to substrate in accordance with manufacturer's recommendations.
- 2** Fix vertical 25mm x 50mm battens to substrate at 400mm c/c. start 200mm from the ground.
- 3** Fix ventilated starter trim at bottom of area (FC3123) making sure it is level. Fix ventilated closer trim (FC311E3) to top of area.
- 4** Fix Single Part Trims and/or first part of Two Part Edge, Corner and 'H' Trims as necessary. Do not cut second parts of trim to length yet.
- 5** Fit first Cladding Plank to Vented Starter Trim and screw fix top to cladding batten using ACSS250 cladding screws. Where necessary join the end of boards using a compatible Butt Joint or 'H' Trim with the correct expansion joint.
- 6** Interlock next Cladding Plank to the Plank below and screw fix top to cladding batten with ACSS250 cladding screws, repeating the process until the entire area to be clad is covered.
- 7** Cut second parts of 2 part trims to length and clip in place.

Note: Download Dormer Cheek installation information from www.freefoam.com

Cladding Trims

**Freefoam,
the colour
specialist**

COLORMAX[™]
technology

Freefoam is the colour specialist manufacturing one of the most technologically advanced colour PVC-U and PVC-UE fascia and soffit ranges using the unique patented Colormax[™] technology.

Here's the science!

Freefoam manufacture using the co-extrusion process. A strong PVC-UE foam 'core' is simultaneously co-extruded with a rigid PVC-U skin, creating a smooth strong and hard wearing surface.

Colour Guaranteed

Available in a wide range of eight standard colours backed by an industry leading guarantee – up to 50 years on white products* and 10 years on all other colours

Off the shelf

Critically for trade and commercial sectors Colormax[™] technology allows Freefoam to supply the majority of colour products straight from stock. With no minimum order quantities Freefoam make choosing colour an easy option..

Woodgrain

Freefoam work with world leading foil provider Renolit using the Exofol PVC film for all woodgrain products to provide a durable fade resistant product.

Manufactured with two layers, the colour pigments in the base film use Solar Shield Technology to protect the fascia, soffit and cladding against excessive heat build up and the upper transparent layer prevents against fading caused by UV radiation or other weathering effects.

This technology allows Freefoam to offer a ten year guarantee on all woodgrain products.

- Built in sun reflection
- Reduced heat absorption
- Reduced profile temperature and expansion

Colormax Colour range

Fascia, Soffit, Window Boards and Trims

Woodgrain range

Fascia, Soffit, Window Boards, Trims and Cladding*

* Cladding is not available in all woodgrain colours

Notes:

- Colours shown are for availability identification only. Please see colour swatch or product samples for exact colour representations.
- Please note that the nearest Ral numbers above are provided for reference purposes only and do not guarantee a precise match. It is recommended that actual Freefoam product samples be used for comparison purposes.
- Please contact Freefoam or see our Technical & Specification Manual for nearest Pantone and NCS reference numbers.

Freefoam and the environment

Freefoam is committed to the prevention of pollution and to continual improvement in environmental management and performance. To reinforce our commitment we have achieved ISO 14001:2004 Environmental Management System certification in Group and implement this on an ongoing basis.

Freefoam and Recycling

- Freefoam currently recycle 85% of post production waste and are targeted to increase this to 98%.
- Freefoam keep scrap rates below 10% with highly efficient production processes.
- Freefoam products are 100% lead free; we mean complete product, not just the skin.

Note:

All specifications, dimensions, descriptions and illustrations contained in any Freefoam sales literature, quotation, or pricelist or other advertisement matter are intended merely to present a general idea of the goods that we sell. We reserve the right from time to time to make changes which are required to comply with any applicable safety or statutory requirements or which do not materially affect the quality or fitness for purpose of the goods you purchase from us.
